

KEEP IT PUBLIC!

Albertans value public health care, so why is Alberta Health Services continuing to move towards private delivery?

Despite talk of an “Alberta Advantage”, Albertans pay higher out of pocket costs for health care than other Canadians. Any “savings” realized by privatization schemes ultimately come out of your pocket. Recent bankruptcies at private facilities around the province show that private sector management is not the answer to health care improvements.

Time and again, Albertans have spoken up when faced with privatization threats under Bill 11, the Third Way and more. When will the Alberta Government get the message that we do not want an American-style health care system?

Hospital workers, patients and concerned citizens are united in saying NO to privatization.

WHAT CAN YOU DO? SPEAK UP!

Write letters to the newspaper supporting public health care. We need to make sure the public continues to hear the message.

Write to your MLA, or meet with them in person and let them know you want a strong publicly funded and delivered health care system. To find your MLA call 310-0000 or visit www.assembly.ab.ca .
