

Minister of Health Mr. Shandro,

In honour of Mother's Day I am writing to you about something we all hold dear
... **TIME**.

TIME is something that a lot of our parents and grandparents, depending on your age, have watched go by.

TIME is what a lot of these loved ones have given in order to build this province.

TIME is what many of our seniors have very little left to spend on this earth with family and friends.

TIME is what many of our seniors gave in defence of this great country we live in through many conflicts.

TIME is a subject that one can't let slip by when there is a call to action.

TIME is now for your government to step in to support the most vulnerable of our society, our seniors.

TIME is upon us to take back from the profiteering of these most vulnerable seniors in our society.

TIME is now once to again make seniors care in this province a public responsibility.

TIME is now to respect the many workers who support our seniors in our health care system.

TIME is now for you as health minister to stand up to the ideals you swore to uphold to protect the citizens of this province when the **TIME** came.

TIME is a wasting while you hand over the public responsibility of our seniors care to more profiteering corporate entities that have no regard for the very citizens you are responsible for as they allow them to die.

Well Minister Shandro the **TIME** is passing while you watch many of our seniors die in a health system that is obviously broken that you are responsible for.

It is **TIME** for you as an elected official to do the right thing and bring all seniors health care at all levels under the public purse and manage it under one umbrella.

It is **TIME** for you to to give me the 6 minutes that the seniors care world have been given to allow the health care workers to look after them in the run of a day.

As a citizen of this province and a constituent you are responsible for I request that you respond to my e-mail and schedule a **TIME** for me to have a conversation with you regarding seniors care in this province.

Another concerned citizen

Kevin Barry
